OBJECTIVE

Recently trained Oracle Fusion Technical Consultant with a strong back-end development foundation and growing expertise in Oracle Cloud technologies, report generation, and system integration. Seeking an opportunity to apply my training and technical skills to contribute to innovative Oracle Cloud projects and ERP solutions while continuing to develop hands-on experience.

CERTIFICATIONS

- **Oracle Fusion Cloud Development, Global Academy (Ongoing)**
- Oracle Cloud Infrastructure Certified Foundations Associate, Oracle University (2025)
- Application Integration on Oracle Cloud(OIC), Oracle University (Ongoing)
- Oracle APEX Developer Professional, Oracle University (2025)
- **Oracle Fusion Technical Consultant, Next Academy (2024)**
- ALX Software Engineering Program (2023 -2024)
- Professional Front-End Web Development, Udacity (2023)
- Full Stack Web Developer Nanodegree Program, Udacity (2019)
- Front-End Development, Udacity (2019)

SKILLS & ABILITIES

Technical Skills:

- **Oracle Cloud Reports:** Oracle BI Reports, Oracle OTBI Reports.
- **Oracle Fusion Applications:** Trained in Fusion integrations (SOAP/REST APIs), reporting, and technical customizations.
- **ERP Systems:** Basic knowledge of ERP system workflows and integration processes.
- **Development Platforms:** Oracle APEX, Visual Builder, Oracle Integration Cloud (OIC).
- **Programming & Databases:**
 - SQL, PL/SQL, NoSQL.
 - JavaScript, Node.js, HTML5, CSS3, Bootstrap.
 - C, C++, Java, Python.
- **Version Control & Operating Systems:** Linux, Git, GitHub.

Soft Skills:

- Scrum Methodology & Project Management.
- Self-learning and adaptability.
- Problem-solving and critical thinking.
- Effective communication and collaboration.
- Time management and organizational skills.

PROJECTS

- **Doctor Appointments App** – Built in Oracle APEX using APEX Workflows; includes approval flows, task assignment, dashboards, and API integration.
- **Inventory Management System** – End-to-end system Built in Oracle APEX with supplier/customer modules, payments, invoices, and validations.
- **Oracle APEX Practice Projects** – Developed several applications to practice report generation, workflows, and REST API integration.
- **Weather-Journal App** – Asynchronous web app using Node.js and external Web APIs to update UI dynamically based on user input.

EXPERIENCE

2023–Present **Private Programming & IT Tutor, Self-employed / Freelance**

- Delivered personalized tutoring in **Java, Databases, Cybersecurity**, and core IT subjects, focusing on both theory and hands-on application.
- Supported students in building coding skills, debugging, and preparing for projects or assessments.
- Adapted teaching methods to individual learning styles, promoting problem-solving and tech confidence.

2018-2020 **Computer Teacher, Albatool International School**

- Trained 100+ students in programming, cloud computing, Microsoft Office, and cybersecurity, achieving an 85% improvement in skills.
- Delivered 50+ lessons on cybersecurity and digital literacy, enhancing online safety awareness.
- Managed the student information system and facilitated a smooth transition to online education during COVID-19, reducing technical issues by 30%

EDUCATION

Bachelor of Science in Computer and Information Science
Cairo University, Egypt — 2015
Graduation Project: **A+**
